GIRIŞ

Proje Konusu: http://hocaismi.cv.nku.edu.tr formundaki sayfalardan akademisyenlere ait bilgileri çekip bu bilgilerden her akademisyene ait elde edilen bilgileri kullanarak bir SQL veritabanı tasarlanması. Oluşturulacak veritabanını kullanarak hangi akademisyenin hangi dönem hangi dersleri verdiği, hangi bölümde kaç tane akademisyen olduğu, hangi akademisyenin hangi idari görevleri yerine getirdiği gibi sorgular kolay bir şekilde yapılabilmeli ve akademisyen sayfaları ile tutarlı bilgiler üretmelidir. Tasarlanacak sistem için Docker image oluşturulup bu bu image Docker Hub'a yüklenecek. Ayrıca Docker Hub'a yüklenen image kullanılarak tasarlanan sistemin nasıl ayağa kaldırılacağını açıklayan bir dökümantasyon hazırlanacak. Bu dökümantasyonu Github hesabında ya da kişisel web sayfasında yayınlanacak.

KISALTMALAR

VS = Visual Studio

SQL = Structured Query Language

DB = Database

SSMS = SQL Server Management Studio

PK = Primary Key

FK = Foreign Key

UK = Unique Key

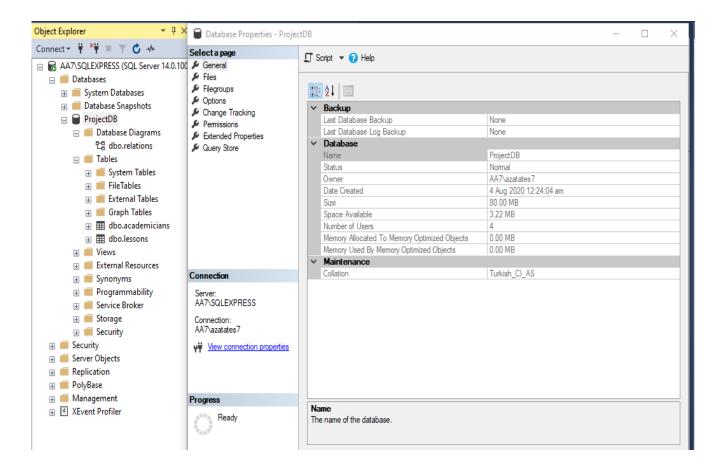

DF = Default

Dbo = DataBase Object

SP = Store Procedure

EXEC = Execute

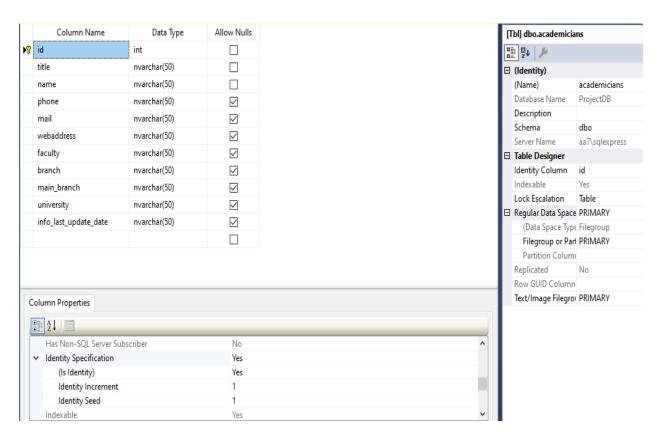

VERİTABANI YAPISI

- Veritabanı **ProjectDB** adıyla oluşturuldu.
- Windows Authentication ile bağlantı sağlandı. (connectionString buna göre ayarlandı.)
- Karakter problem yaşanmaması için Collation Turkish_CI_AS seçildi.
- İki temel tablo oluşturuldu. (dbo.academicians, dbo.lessons)
- İlişkiler diyagramı relations adıyla oluşturuldu.
- Server Name = AA7\SQLEXPRESS username = sa password = pRoJeCtPaSsWd

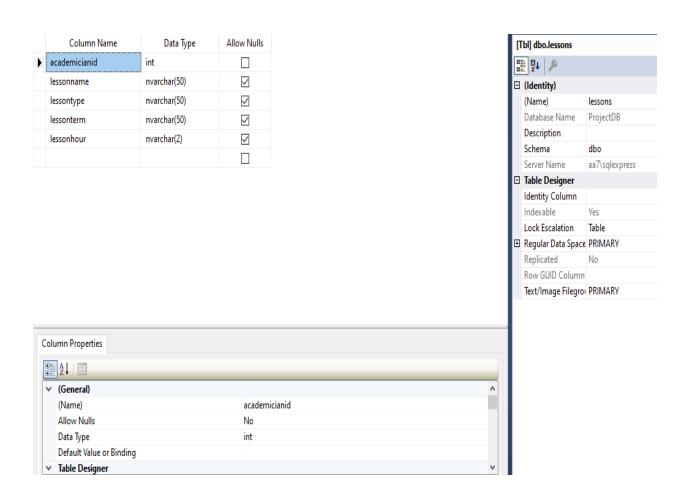

TABLOLARIN YAPISI

1. TABLO => dbo.academicians

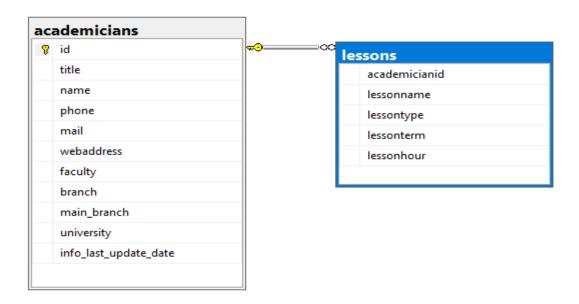

- Akademisyene ait temel bilgileri içeren tablo.
- Ayrıca son güncelleme bilgisini içeren alan eklendi.
- Id, INT ve otomatik artan yapıda.
- university alanı default olarak (N'Tekirdağ Namık Kemal Üniversitesi') seçili ve kodlamada bu alan eklenmiyor default değer direk tabloya ekleniyor.
- title, ünvanı içeren alan.
- branch, bölümü içeren alan.
- main_branch, and bilim dalını alanını ifade ediyor.

2. TABLO => dbo.lessons

- Akademisyelere ait dersleri içeren tablo.
- academicianid alanı aynıanda çooklu insert içerdiği için primary key seçilmedi.
- lessontype, dersin Doktora, Yüksek Lisans, Lisans ya da Ön Lisans olduğunu belirtir.
- Ders bilgisi yoksa kayıtlara sadece boş bir alan eklenir ve iki tablo arasındaki bağlantının devamı sağlanır.

TABLOLAR ARASI İLİŞKİLER

academicians.id ile lessons.academicianid alanları ilişkilendirildi. (FK_lessons_academicians)

PROJE MIMARISI

• Programa Dili: C#

Platform: ConsoleVeritaban: MsSQL

• VTYS: MS SQL Server Management Studio

• .NET Versiyon: .Net Framework 4.6.1 (Net Core 3.1 ile Html Agility Pack uyumsuz)

• Kullanılan Kütüphaneler & Teknolojiler

Html Agility Pack (Web Scraping)

Selenium (Web Scraping)

Selenium Chrome Driver

Regex (Karakter Eşleşmeleri)

Dosya İşlemleri (Verileri Dosyaya Yazıp Verimli Olarak İşleme)

Sql Connection (VS <-> SSMS Bağlantısı)

KODLARIN ANALİZİ VE VERİTABANINA EKLENMESİ

(Bazı küçük alanlar kod bloklarında açıklama satırı olarak eklenmiştir.)

- Kod bloklarında # karakteri kullanılmamıştır.
- Temel kod içerisinde bazı alanlara // ile açıklama eklenmiştir.
- Aşağıda kodların yanında # sembolü ile kare içinde açıklama eklenmiştir.

```

KODUN ÇALIŞMA SİSTEMI

- 1- Tüm fakülte sayfalarındaki akademisyenlere ait mail bilgileri bir dosyaya yazılır.
- 2- Bu alanlar @ ile split edilip hocaismi.cv.nku.edu.tr olarak satır satır cv_list dosyasına eklenir.
- 3- Eklenen satırlardan ana sayfa linkine erişilir.
- 4- Linkdeki sayfa içeriği alanları ayrılarak veritabanına eklenir.
- 5- Linklerdeki dersler alanına erişilir.
- 6- Dersler parçalanarak veritabanına eklenir.

VERİTABANININ DIŞARI/İÇERİ AKTARILMASI

DECLARE @BackupFile NVARCHAR(255);
SET @BackupFile = 'C:\database_backup.bak';
PRINT @BackupFile;
BACKUP DATABASE [ProjectDB] TO DISK = @BackupFile;

Docker ve SQL Server arasında yaşanan problemden dolayı direk veritabanından yukarıdaki script aracılığı ile veritabanı export edilmiş drive linkinde ve zip içerisinde yer alacaktır.

LINKLER & DETAYLAR

- https://stackoverflow.com/questions/1126571/import-export-database-with-sql-server-server-management-studio linki aracılığı ile dosya içeri aktarılabilir.
- https://drive.google.com/drive/folders/10ugaGX9MnlFAGTd-ErvGFH4YoC4sfSvn?usp=sharing linki aracılığı ile kodlar, dökümanlar, veritabanı yedeği gibi dosyalara erişilebilir.
- Kaynakça da linkler sonradan eklenmiştir. Bu nedenle bazı linkler eklenememiştir.
- Kod çalıştırmada sorun yaşarsanız Program.cs yi kopyalarak yeni .NetFramework Console açarak Html Agility Pack, Selenium, Selenium Chrome Driverı Package Manager veya Nuget aracılığı ile yükleyerek projeyi sorunsuz çalıştırabilirsiniz.
- Veritabanının import edilmesinde bir sıkıntı yaşarsanız mail ile ulaşabilirsiniz.
- Drive üzerinden görüntüleme yetkisi genel olarak verilmiştir. Sorun yaşarsanız mail ile ulaşabilirsiniz.
- Kodlar sadece drive üzerinde diğer tüm ekler zip içerinde yer alacaktır.
- Tüm dosyalar(zip dahil) drive üzerinde yedeklenmiştir.
